PROFESSIONAL SUMMARY

Java Full Stack Developer (MCA candidate) with 6 months of professional experience designing and delivering full-stack web applications using Java, Spring Boot, Spring MVC, Hibernate, React JS, PostgreSQL, and MySQL. Skilled in building RESTful APIs, implementing JWT-based authentication and role-based access control, designing normalized relational database schemas, and writing clean, maintainable, object-oriented code. Experienced with Git-based Agile workflows and translating business requirements into scalable backend solutions. Seeking a Java Backend / Full Stack Developer role to apply strong problem-solving and software engineering fundamentals.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL

Frontend: HTML5, CSS3, React JS

Backend: Spring Boot, Spring MVC, Spring Security, Hibernate, REST APIs, JWT Authentication

Database: PostgreSQL, MySQL, MongoDB

Tools: Git, GitHub, Maven, Postman, Flyway, Firebase, Cloudinary

PROFESSIONAL EXPERIENCE

Associate Software Engineer — ThynkTech India Sep 2025 – Jan 2026

Tech Stack: Java, Spring Boot, React JS, PostgreSQL, REST APIs, JWT, Flyway, Git/GitHub

- Engineered and delivered 3 full-stack web applications end-to-end using Java, Spring Boot, React JS, and PostgreSQL within an Agile team environment.
- Retail Billing System:** Designed and developed RESTful APIs in Spring Boot for inventory, invoicing, and sales tracking, secured with JWT-based authentication; used Flyway for versioned PostgreSQL schema migrations and integrated an AI-based model to automate billing calculations, ensuring data consistency through transactional handling.
- Shubhvivah (Matrimony Platform):** Implemented profile management, match search, and JWT-based secure authentication using Spring Boot REST APIs backed by a normalized PostgreSQL schema.
- Enterprise Portal:** Architected role-based access control (RBAC) and full CRUD REST endpoints integrated with React JS dashboards, structuring the codebase for reusability across modules.
- Debugged and resolved production issues, and translated business requirements into REST API contracts while collaborating through Git/GitHub version control workflows.

EDUCATION

Master of Computer Applications (MCA) 2025 – 2027

Dr. D. Y. Patil Centre for Management & Research, Chikhali, Pune | In Progress

Bachelor of Computer Applications (BCA) 2022 – 2025

Dr. D. Y. Patil ACS Women's College, Pimpri, Pune | CGPA: 8.47 / 10

ACHIEVEMENTS

- Delivered 6+ web and Android applications covering REST API design, authentication, and database modeling, independently and in teams.
- Built a solid foundation in Core Java, OOP, and DBMS/SQL through coursework and hands-on projects.
- Proficient in Git-based collaborative workflows, including branching, pull requests, and code reviews.
- Strong understanding of Data Structures & Algorithms; completed Full Stack Java Development certification.
- Earned SQL (Basic) and SQL (Advanced) certificates from HackerRank.
- Completed the HackerRank 30 Days of Code challenge.

PERSONAL PROJECTS

Waste Management App

Tech: Android, Java, XML, Firebase, Cloudinary | *GitHub:* [Community-Based-Waste-Management](#)

- Developed a social Android app for community cleanup coordination, using Firebase Realtime Database to sync activity across multiple users in real time.
- Integrated Cloudinary for image upload and storage, letting users visually document and share waste locations to speed up cleanup response.
- Designed an intuitive XML-based Android UI that simplified reporting and tracking of cleanup activities for community members.

Student Management System

Tech: Python, Django, MongoDB | *GitHub:* [StudentManagementSystem](#)

- Built full CRUD functionality for managing student records, streamlining data entry, updates, and retrieval for administrators.
- Designed a MongoDB schema integrated with Django to support scalable, organized storage of student information.
- Structured the backend to separate business logic from data handling, improving maintainability and code clarity.

Automation Website

Tech: React JS, Java, Spring Boot, MySQL | *GitHub:* [Sure-Automation](#)

- Built a Java/Spring Boot REST API layer to handle CRUD operations for end-to-end service management workflows.
- Designed a normalized MySQL schema to ensure consistent, reliable data storage across the application.
- Developed a responsive React JS frontend, delivering a smooth user experience across screen sizes.

Certification: Full Stack Web Development — Disha Institute (2026) — React JS, Java, Spring Boot, MySQL
